

Hey Prashant,

I just found out a bug in your project.

BUG:

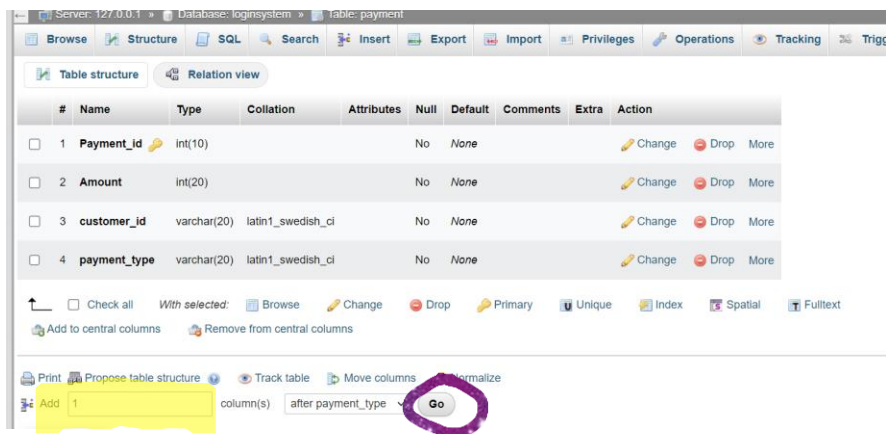

IN Payment section :

Customer name was not getting pushed into "payment" table because in payment table ,
There is no column mentioned for "customer_name".

My PR solution:

- ➔ Go to localhost/phpMyAdmin
- ➔ Add a column for "customer_name"

Now create a column for "customer_name"

->

Name	Type	Length/Values	Default	Collation	Attributes	Null	Index
customer_name	VARCHAR	255	None			<input type="checkbox"/>	---

Pick from Central Columns

☐ Online transaction Preview SQL **Save**

THIS WILL SOLVE YOUR BUG IN Payment section for "customer_name"

Regards,

@mukundtheamateur
